E-VEHICLE BATTERY CONTAINMENT BAG

SPECIFICALLY DESIGNED FOR LARGE SCALE BATTERY PACKS

This new range of EV-FCBs (Fire Containment Bags) provide an effective additional layer of protection for the safe storage and transit of large lithium-ion battery packs to meet the needs of the e-vehicle market.

Utilising the highest grade technical textiles and with many years' unrivalled expertise in the design and production of protective covers we have produced a technically superior range of fire containment bags.

With a variety of applications in mind from electric vehicle assembly plants to battery storage applications the FCB offers the highest level of fire protection.

PROVIDES

- Multi-layered thermal resistant technical fabrics
- Tough and durable inner and outer layers for longer life
- Withstands temperatures of up to 1000°C

KIT INCLUDES

- Full length tough FR Velcro seal
- Multiple reinforced adjustable tightening straps
